

# VIJENDRA PATEL

## Lead Software Engineer - AI & Frontend Architecture (React.js, Next.js & TypeScript)

Madhya Pradesh, India | +91 9179948396 | patelvijendra55@gmail.com

Visionary Lead Frontend Engineer and Architect with 8+ years of expertise scaling enterprise SaaS products, complex datagrids, virtualization, and multi-agent AI workflows. Expert in React.js, Next.js, TypeScript, state management (Redux/Zustand), Web Performance Engineering (Core Web Vitals), and frontend security/accessibility (WCAG, OAuth/JWT). Proven track record of leading engineering teams, driving technical excellence, and transforming complex enterprise data ecosystems into intuitive user experiences.

### CORE COMPETENCIES & TECHNICAL ARCHITECTURE

|                          |                                                                                                                                            |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| Frontend & Frameworks:   | React.js, Next.js (SSR/SSG/ISR), TypeScript, JavaScript (ES6+), Micro-frontends, HTML5/CSS3, Tailwind CSS, Styled Components               |
| Architecture & Scale:    | Data-heavy UI Ecosystems, Complex Ddatagrids, Virtualization, Advanced Charting, Real-time Large-Scale Datasets, Microservices Integration |
| State, APIs & Security:  | Redux Toolkit, Zustand, React Hooks, RESTful APIs, GraphQL, OAuth / SAML / JWT Enterprise Auth, CSP & XSS Mitigation                       |
| Performance & Vitals:    | Core Web Vitals (LCP, FID, CLS), Bundle Size Optimization, Rendering Pipeline Efficiency, Memory Management, SSR Optimization              |
| Quality & Observability: | WCAG Accessibility Standards, ARIA, Frontend Telemetry, Error Tracking, Performance Monitoring, Cypress, Jest, Playwright, CI/CD           |
| Leadership & Processes:  | Technical Team Leadership (2+ years), System Design, Code Reviews, Mentorship, Agile/Scrum, Monorepo Management                            |

### PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                     |

| Cordelia Cruises - High-Throughput Booking & E-Commerce Portal                                                                                                                                                                         | Tech: React.js, Node.js, TypeScript, AWS, Cypress |
| <ul style="list-style-type: none"><li>Engineered complex B2C booking funnels and payment reconciliation flows, incorporating automated E2E testing with Cypress to guarantee absolute reliability during peak sales volumes.</li></ul> |                                                   |

Centerwell (Humana) - Healthcare Enterprise Platform

Tech: Next.js, Node.js, TypeScript, GraphQL, Tailwind

- Designed accessible, ultra-fast web interfaces using Next.js SSR and WCAG standards, substantially improving Core Web Vitals and backend microservice integration efficiency.

Spectrum Enterprise - B2B Network Portal

Tech: React.js, Node.js, TypeScript, Redux, Docker

- Architected scalable state management pipelines and adaptive data dashboards for enterprise network portals operating in complex real-time environments.
